

China Sourcing Satisfaction

Making Sure Your Transportation And Supply Chain Runs Smoothly Half A World Away

Challenge:

Sourcing Unlimited is an ISO 9002 and C-TPAT certified full service manufacturing partner. The company was founded in 1999 by a core group of experienced manufacturing professionals. Today Sourcing Unlimited has more than 125 employees and five manufacturing operations in US and China. Sourcing Unlimited wanted to improve the quality and efficiency of its international supply chain to better serve its customers. Headquartered in New England, Sourcing Unlimited vision was to outsource their global logistics management services in both China and the US to ensure things keep moving smoothly half way around the world.

Solution:

BOC International implemented a strategic global logistics plan. BOC manages a full service warehouse facility in Shanghai, China. In conjunction with on site Sourcing Unlimited personnel, BOC receives product from over thirty five Chinese vendors and perform quality control, inspection and container load planning. BOC coordinates all ocean and air transportation movements as well as the regulatory compliance functions both in China and US.

“ BOC has helped us shorten lead times, lower costs, and become compliant. Our partnership has helped both our companies grow together.”

Michael Porter, Founder and CEO

How Sourcing Unlimited benefits from working with BOC International:

- *Diverse expertise on site in China*
- *Compliance and regulatory programs*
- *Customized VIP tracking logistics reports – increased visibility*
- *Carrier sourcing, negotiation and weekly space allocation*
- *Timely and complete international documentation*
- *Strong working relationship builds trust*
